" DGCA Ground School For Pilots "

# SKYJET Pilot Training Academy

“At SkyJet, we don’t just teach you how to fly—we prepare you to lead in the cockpit and beyond.” Aviation is more than a profession; it’s a calling. At SkyJet Pilot Training Academy, our mission is to shape disciplined, knowledgeable, and confident aviators who are ready to meet the global demands of the aviation industry. Our ground school is built on precision, professionalism, and a relentless commitment to excellence. With a team of Best instructors, a DGCA-aligned curriculum, and state-of-the-art training resources, we provide more than education—we deliver transformation. Every student here is mentored to rise with skill, safety, and integrity. When you join SkyJet, you join a legacy of high standards and a future of unlimited altitude.

**Capt. Abhishek Shringarpure**  
(CEO)

**Mrs. Radhika Joshi - Shringarpure**  
(Founder Director)

## Why Choose Our Ground School?

### 1. Expert instructors

Our team of seasoned instructors brings extensive aviation Expertise to the classroom. Benefit from their wealth of knowledge and practical Experience, ensuring you receive top-notch education.

### 2. Comprehensive curriculum

Dive deep into the fundamentals of aviation with

Our comprehensive curriculum covering subjects such as:

- aerodynamics • meteorology • navigation • air traffic control procedures
- aviation regulations

### 3. State-of-the-art facilities

Experience learning in a modern and conducive

Environment. Our classrooms are equipped with the latest instructional

Technology, providing an engaging and interactive learning experience.

### 4. Updated study material and knowledge

We have industries most advanced and updated theory notes and test papers,

Frequently asked question's and explanations !! In offline and online mode !

*“Its not the skies but the ground schools where great pilots are made”*

# Steps To Become A Pilot ?

## STEP 1: EDUCATIONAL QUALIFICATION:

Complete your 10+2 education with a minimum of 50% marks in physics and mathematics. Some flight schools may have specific Educational requirements, so it's essential to check with the chosen training institution. Pass in 10+2 with maths and Physics / diploma equivalent in case your educational background is from other streams for e.g-commerce, arts, etc you Will have to appear for physics and mathematics separately from recognised open schools such as nios "national institute of open schooling"

## STEP 2: MEDICAL FITNESS ( Class 2 & Class 1 )

We need to be 100% sure that you are medically fit to fly before you invest your money in a pilot course as it's a mandatory Requirement. The medicals are a 2 step process. Class 2 medicals: it can be carried out throughout india with doctors Appointed by dgca. Post completion you will be handed a ca-35 assessment form as fitness certification and your reports will be Sent to the office of dgca for the issue of medical assessment later on you receive a final medical assessment from dgca. Class 1 medicals: class i initial medical assessment can be carried out in only 5 cities (mumbai, banglore, delhi, chennai & johrat). Class i medical assessment date can only be requested post receiving class 2 assessment from dgca. Class 2 medical dgca approved doctors in pune

## STEP 3: JOIN GROUND CLASSES FOR DGCA THEORY PAPERS

Undergo ground school training, which covers theoretical aspects such as air regulations, navigation, meteorology, And aircraft systems. Theory exams for all subjects are conducted 8 times a year. Most the theory papers are multi choice Questions (MCQ) type and given that you have put enough work preparing for the exams you should be able to select the right Answers. Theory papers you need to pass will depend primarily on the choice of your flight training school whether it is in India or Abroad.

AIR NAVIGATION | AVIATION METEOROLOGY | AIR REGULATIONS | TECHNICAL GENERAL | TECHNICAL SPECIFIC | RADIO TELECOMMUNICATION (RTR-A)

## STEP 4: FLIGHT TRAINING

The next step is where the adventure begins and you will take seat in an aircraft to start your flying lessons but choosing the right Institute for flight training is of paramount importance as the skills you develop as a pilot will largely depend on the choice of your Flying school. As the saying goes, a pilot's license in your pocket will only get you an interview, it is the quality of your flight training That will get you your airline pilot job. If you choose a flying school abroad you will have the privilege of holding a dual pilot license Which can be highly advantageous in your career ahead for quick reference we have simplified the minimum flight training Requirements laid down by the regulator and you can refer the same on [www.dgea.gov.in](http://www.dgea.gov.in) this course offers 200 hours of flying Training this 8-10 months course offers dual / solo, general flying, circuit & landing sorties. Instruments and cross country flights, Skill tests, route checks and night flying rating as per DGCA requirement.

## STEP 5 : TYPE RATING

A type rating is an authorization entered on or associated with a pilot licence and forming part thereof, stating pilot's privileges Or limitations pertaining to certain aircraft type. Such qualification requires additional training beyond the scope of the initial License and aircraft class training in Indian aviation three main aircraft manufacturers are working with the airline, Boeing/airbus and ATR, after completing CPL if necessary students needs to do type rating on either of these, A320/b 737 or ATR popular among those! After studying market demand we recommend students to do a type rating Either company sponsored or self sponsored (if you receive latter of job confirmation from airline company) You can consider this but need not to worry about it!
